HIGH POWER RESIDENTIAL

Custom designed system, Grange, St Peter Port, Guernsey

Once you are into the realms of 10kW solar PV output and contemplating another 10kW, perhaps you should be thinking of high power storage.

- 10kW PV to 25kW PV?
- Heat Pumps on site?
- Electric car charging?

➤ **10kW three-phase storage**

Technical Services

HIGH POWER RESIDENTIAL

Couple this 10kW Storage unit up to your photovoltaics and electrical system, power your home at night and in expensive peak periods.

Utilise your solar fully and help balance the grid.
Reduces peak power output from PV by transferring loads off peak times.
Rather than exporting use your power when you need it.

Play a significant part of the energy community.
Power yourself, power the Island.
